FEMCITIES

An initiative of the city of Vienna’s Womens department to support municipalities throughout Europe in implementing gender equality, improving living conditions for women, setting up structures to fight violence against women, exchanging good practice models and strategies to close the gender pay gap, etc.

The network was founded in 1997 and originally focused on cities in then candidate countries in CEE; today its member cities span several countries in “old” and “new” EU.

The network organizes annually conferences on specific topics and presents its studies and activities on its homepage www.femcities.at
